VAIDIO ™

CROWD DETECTION

www.aicuda.world

The Vaidio AI Vision Platform delivers video analytics solutions for Security, Safety, Access Control and Social Health Screening. Vaidio's advanced AI makes video monitoring, security alerts, health screening and forensic investigation more accurate, more automated, and more affordable - and helps make your business safer and more secure.

Vaidio can accurately count the number of people in any given scene using the Video Search function. The user can choose if they want to be alerted of scenes with greater than, less than, or equal to a specified amount of people. This can be used in conjunction with Vaidio's Distancing Detection and Occupancy Detection to ensure proper COVID-19 safety precautions.
