

DISTANCING DETECTION

www.aicuda.world

Vaidio's Social Health Analytics suite is ideal for banks, offices, retail stores, hospitals, transit stations, airports, schools, restaurants - just about any social environment that is looking to re-open and operate more safely during the coronavirus pandemic. Vaidio helps to significantly reduce the cost of COVID-19 health screening for your organization and customers, and the platform can be easily updated and repurposed in the future.

Vaidio's AI Distancing Detection allows you to identify people not practicing safe social distancing. This function works by sending an alert when two or more people are within 6 feet from one another. This is one of our proven essential functions during the COVID-19 crisis, for it prevents the spread of the virus while allowing you to focus on business productivity.

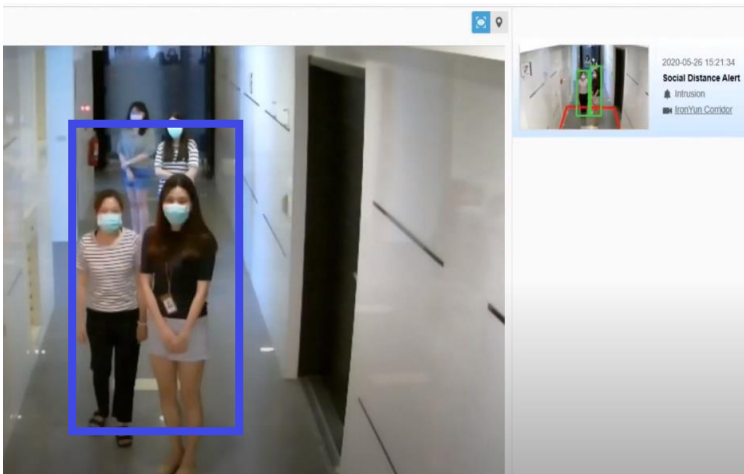

FEATURES

- ❑ Detect people within 6 feet from one another
- ❑ Track detected individuals to take further action
- ❑ Receive alerts of detection in real time
- ❑ Integrate with most VMSSs
- ❑ Use in conjunction with other Vaidio AI analytics
- ❑ Compatible with nearly all ONVIF IP cameras
- ❑ Integrate with access control systems via http connection to limit access for people not practicing safe social distancing
- ❑ Avoid false alarms caused by irrelevant motion in the areas of interest (e.g., vehicle, dog, cat)
- ❑ Can specify multiple areas of interest in the same field of view

BENEFITS

- ❑ Use in any facility to manage and maintain proper health safety precautions during the pandemic
- ❑ Purchase the complete Social Health Analytics suite to derive full benefit, which includes Face Mask Detection as well as Temperature Detection, Distancing Detection, and Occupancy Detection
- ❑ Access Vaidio's user-friendly UI
- ❑ Increase productivity of any establishment by having Vaidio detect health safety violations, allowing you to focus on your business
- ❑ Receive rarely needed technical support from our operations team whenever necessary
